

Programme

Introduction – about BI

BI Centre for Energy

Three miniature lectures

Findings from interviews and discussions

Next steps

The purpose of the interviews was to map expectations

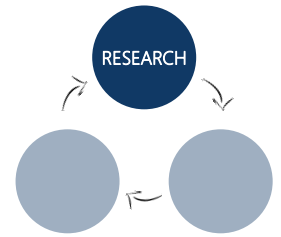

Interviewed Council Members

- Erling Matland, Aibel
- Jørgen Arnesen, COSL
- Atle Sonesen, VNG
- Lars Erik Aamot, OED
- Dag Omre, Centrica
- Leonid Surguchev, Lukoil
- Gro G. Haatvedt, AkerBP
- Kirsten Berg, Statnett
- Preben Strøm, SSV
- Harald Norvik

Findings

Focus should be on exploring drivers of transformation and co-creating the future energy industry

The consequences and opportunities of;

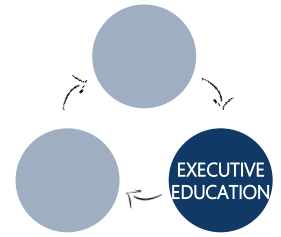

1. Technological developments

- Sourcing, sharing and use of data
- Project models and forms of collaboration
- Contracts and risk-sharing
- Business Models and organizational forms
- Leadership approaches

2. Green transformation

- Future energy mix – National/global
- Utilization of natural resources - Analyses and prognoses
- Political and Economic regulation

There is uncertainty related to future key competencies

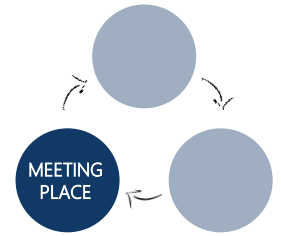

Overview and depth

- Technological developments
- Industry and market developments
- Social and Environmental Responsibility
- Combination of Engineering and Economics/Business
- Value chain and value creation
- Leadership

Applying new technology

- Utilizing rapid technological advances
- Utilizing Big Data, algorithms and machine learning

There is a potential for a new and unique industry meeting place

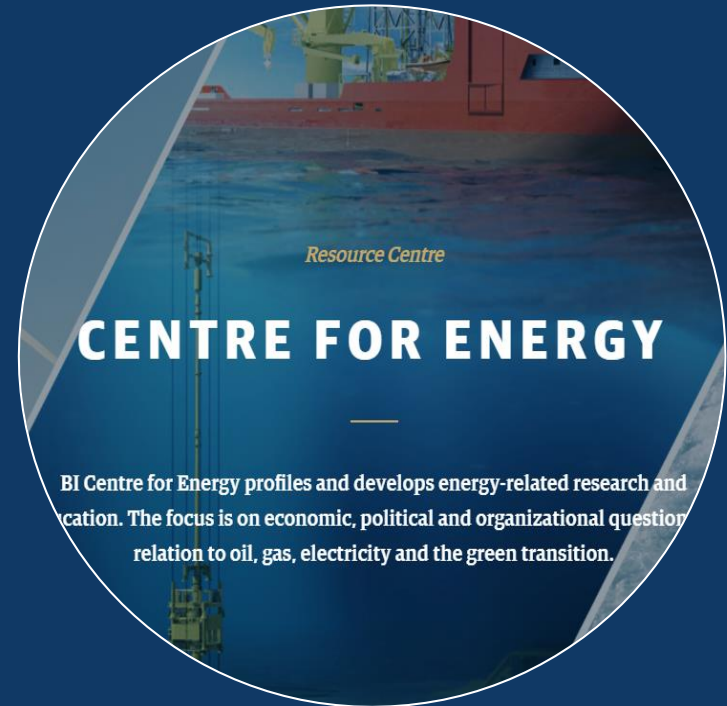

Critical Success Factors

1. Relevant and unique/new topics
2. Committing activities, projects and solutions
3. Meetings both within and between industries and industry sectors
4. Collaboration between BI and institutions of technological research and competence
5. Close contact between academia, industry and policy makers

Expectations from council members

- Relevant and solution-oriented meeting place comprising executive level participants
- Gain insight and new knowledge as well as contributing to a competitive Norwegian industry
- Leading national forum, internationally oriented and future-facing
- Provider of knowledge to public and political debates

Discussions – Pilot projects

1. Which general topics and/or specific challenges would you like to see addressed through pilot projects?
2. How would your company like to be involved and engaged in these projects?
