#### CALL FOR PAPERS

The scope of the conference is broad, and we welcome submissions from the full spectrum of corporate governance, whether it is from law, economics, finance, accounting, or management. The conference invites manuscripts on the topic of corporate governance in general and manuscripts that concern the Nordic model in particular.

The conference provides a forum to present research, debate and discuss current developments impacting corporate governance issues. Areas of interest include, but are not limited to:

- Nordic corporate governance in a globalized world
- Laws, regulation and judicial efficiency
- Stakeholders, employees and corporate governance
- Ownership differences and ownership forms
- Institutional investors and shareholder activism
- Accounting and auditing
- Boards, management and managerial incentives
- Political perspectives, taxes, and the influence of the state on Nordic capitalism
- Informal governance and reputational factors
- Nordic corporate governance in a historical perspective
- Corporate Social Responsibility

The conference primarily targets research from and about Nordic countries, but researchers from outside the region are also welcome to submit their work. Submission of drafts from on-going research is encouraged. PhD candidates are welcome to submit their work. All papers will have a pre-assigned discussant.

We encourage researchers to submit works-in-progress as it provides a unique opportunity for sharing valuable ideas, eliciting useful early-stage feedback on current work and preliminary results, and fostering discussions and collaborations among colleagues.
